CDB enters into collaborative agreement with KAIST

Apr 4, 2013 – The RIKEN Center for Developmental Biology is pleased to announce a new agreement with the Korea Advanced Institute of Science and Technology (KAIST) intended to promote inter-institutional exchange and collaboration. This is the ninth such memorandum of understanding between the CDB and an overseas organization, and provides for the sending and hosting of students and research scientists, the holding of joint meetings, and establishes a framework for research collaborations between labs at the two institutions.
